

PRACTICAL CASE

1) You are an English Foreign Language teacher in a public school. One of your fourth graders has been diagnosed with dyslexia this school year although she has been presenting problems since year 1. She graduated third grade failing Spanish and English. Plan specific measures for this student in order to develop as much as possible her personal capacities and to achieve the objectives planned for year 4 in English as a Foreign Language.

3) You suspect that one of your fourth graders is being bullied by some classmates. What would be your proposals as an English teacher in the school taking into account the legal framework of the Valencian Community?

2) Can you explain the theory of Multiple Intelligences? How can it be applied to English lessons? Justify your answer.
